

## FLOW RACKING SYSTEM

1.	Pallets can be located, accessed and moved individually
2.	Rapid handling of almost all types of pallets used goods.
3.	Infinitely adjustable and offering a wide range of options and components to accommodate specific needs.
4.	Maximized space use in any warehouse configuration while retaining optimum product accessibility.
5.	Strength and rigidity prevent compression damage to goods.
6.	Bottom level of pallets can be stored on the floor, lowering structure costs.
7.	OEM/ODM can be accepted.
